

## Keyboard Recommendations

Although a full size 88 key minimum with weighted keys is always a strong recommendation for the instrument to have a similar touch to a real piano, I completely understand if you are looking for something more accessible at the moment. Below are some options that I recommend for beginner students.

- **Beginner students (3-4 yrs old students)**

Some of the most popular brands are [listed here](#). These are some of the pricier options, but you can always find really good deals on a keyboard on Craigslist or Amazon for a lower price. Also, these [keyboards for beginners](#) are the most recommended keyboards with reviews from the developers.

At the studio, I have a [Yamaha YDP 164](#) (\$1,500) and a [Yamaha YDP 143](#) (\$900) which allows a very similar touch to an acoustic piano. I really love these two and strongly recommend them! All of the Yamaha's YDP are of great quality.

Feel free to choose whatever you are comfortable with to achieve the main goal of making music!
